Built
Partly built
Planned
Hand-built ground-truth case graphs
verified quotes, one row per statement
1 Collect
FCC ULS, Form 602 and GLEIF bulk downloads
→ dated, fingerprinted snapshots
2 Extract
Parse rows and passages with exact locators; never edited
→ raw records
3 Record statements
One row per source statement: share ranges, dates, legal status
→ entities and ownership / control links
4 Match and infer
Splink 'possibly same' links, inferred links, timing evidence
→ explained candidate links
5 Measure
Absorbing Markov chain up from each licensee; separate control reach
→ owner probabilities, entropy, anonymity set, hops (as ranges)
6 Present
Every result traced to its sources; unverified matches shown separately
→ report built; API and web app planned
User review
confirm or reject matches; audit trail
